please note that systems microbiology does not consider descriptive studies that are solely based on amplicon e g 16s rrna profiles unless they are accompanied by a clear hypothesis and experimentation and provide insight into the microbiological system or process being studied microorganisms often overlooked due to their diminutive size play a pivotal role in the intricate tapestry of life on earth their ubiquitous presence in diverse ecosystems from the depths of oceans to the heights of mountains underscores their significance in shaping the planet s biogeochemical cycles and influencing the health and well being of all living organisms this research topic aims to delve into the multifaceted interactions between microorganisms and humans animals plants and environment interface shedding light on their ecological functions their impact on human health and their potential applications in sustainable development the research topic will employ a multidisciplinary approach integrating techniques from microbiology ecology genomics and environmental science by examining microbial communities in various ecosystems including soil water air and the human microbiome to investigate their taxonomic composition metabolic activities and functional roles aid offered by advanced sequencing technologies helps to characterize microbial diversity and identify novel species with potential applications in biotechnology and medicine one key focus of this research will be to elucidate the role of microorganisms in nutrient cycling and bioremediation microbes are essential for decomposing organic matter releasing nutrients that are vital for plant growth and ecosystem productivity they also play a crucial role in bioremediation a process that involves the use of microorganisms to clean up contaminated environments by understanding the microbial mechanisms involved in these processes we can develop a collection of articles on sustainable agriculture waste management and environmental restoration another important aspect of this research topic is to explore the interactions between microorganisms and higher organisms microbes can have

profound effects on the health and behavior of animals and plants for example the human microbiome plays a critical role in digestion immune function and mental health understanding these interactions can lead to new approaches for treating diseases and promoting human well being additionally microorganisms can influence plant growth and productivity by promoting nutrient uptake protecting against pathogens and enhancing stress tolerance furthermore this research topic gives insights into the impact of human activities on microbial communities such as antimicrobial resistance and their ecosystem functions climate change pollution deforestation and urbanization are all disrupting ecosystems and altering microbial diversity by publishing research articles on the effects of these disturbances on microbial communities we can present collection articles that describe the risks to ecosystem stability and develop strategies for conservation and mitigation in total this research topic aims to provide a comprehensive understanding of the role of microorganisms in ecosystems and their interactions with humans animals plants and environment interface by advancing our knowledge in this field we will have a collection of innovative solutions to pressing global challenges such as climate change food security and human health

thesis m a from the year 2013 in the subject business economics miscellaneous grade 87 1st university of nairobi management science course operations management language english abstract the aim of this research was to find out the role of various ict applications in the improvement of operational efficiency for supermarkets in nairobi it aimed to answer the questions of ict applications that are adopted by supermarkets in nairobi and the relationship between the level of adoption of these applications and operational efficiency that was attained a sample of 58 supermarkets was chosen from the list of 110 supermarkets to which structured questionnaires were issued by drop and pick method the forty two questionnaires were duly filled and returned this constitutes 72 4 response which according to stacks 2011 was adequate for use in analysing and presenting findings for the identified research objectives the findings indicated that applications that were simple and cheap to install and implement such as cctv cameras electronic point of sale systems and bar code readers were most prevalent while advanced and relatively expensive ict applications such as ecommerce supply chain systems and enterprise resource systems were least used the size of supermarkets also determined ict equipment that were used coefficient of correlation of 0 52 was obtained from the regression analysis that measured the strength of the relationship between dependent and independent variables the relationship was direct meaning that supermarkets with largest extent of ict application in their

premises had the highest operational efficiency it was recommended that supermarket owners acquaint themselves with ict applications that are available in the market and evaluate those that are suitable for their needs supermarkets that had a wide array of application in their premises had high operational efficiency it is therefore necessary that they use all available ict applications depending on their needs given that some ict applications were expensive to buy and implement it was suggested that developers make applications that are suitable for local needs with regard to supermarkets

academic paper from the year 2008 in the subject literature africa language english abstract corruption has been considered endemic to nigeria how do nigerian literary artists depict this social illness in their literary works this article examines the treatment of corruption in iyayi s the contract the discourse focuses on the social levels at which corruption is manifested and the effects of corruption on individuals and the society as depicted in the novel the results will indicate that the novel exposes some identified social ills which become endemic when political and institutional leaders put aside their responsibilities of nation building and succumb to the lure of lucre specifically the leaders depicted in this novel use the awards of contracts ostensibly for nation building as blinds for corrupt self enrichment and embezzlements of public funds
